SECRET

SECRET**ATOMIC NUCLEUS****M. I. Korsunskiy**

This book is a popular exposition of problems of nuclear physics. It is intended for students of the upper classes of a medium school interested in problems of physics, for students of natural sciences faculties and technical schools, and also for engineers and technicians.

Main headings of the table of contents follows below.

TABLE OF CONTENTS

	<u>Page</u>
I. Radioactivity	7
II. The Nuclear Model of the Atom	59
III. The Mass of the Atomic Nuclei	81
IV. Fission of Atomic Nuclei	108
V. Discovery of the Positron	137
VI. Artificial Transmutation of Atomic Nuclei	156
VII. Artificial Radioactivity	192
VIII. Mesotrons	220
IX. Neutrino	239
X. Structure of Atomic Nuclei and Nuclear Binding Forces	256
XI. Splitting of Nuclei	273
XII. Nuclear Chain Reaction and the Possibility of Atomic Energy Application	295
Chain Reaction	295
Uranium Pile	302
The Atomic Bomb	305
Conclusion	307
